Understand Your Projection · Oct 13, 2026

How Your Balance Adds Up

Starting Balance	\$44,115.00
Plus Contributions	\$153,120.00
Plus Growth Earned	\$933,918.92
Future Balance	\$1,131,153.92

Starting balance + contributions + investment growth = future balance. Displayed amounts are rounded.

Compare Return Assumptions

Same Inputs · Return Range: ± 2 Percentage Points

Current Plan · 11%	\$1,131,153.92 Your Selected Annual Return
Higher Return · 13%	\$1,625,613.94 +\$494,460.02 Vs Current
Lower Return · 9%	\$795,810.98 -\$335,342.94 Vs Current

Illustrations, not probabilities or guaranteed outcomes. Real returns vary.

Your Rate Explained

Nominal: 11% · Effective Annual: 11.5719%

The input is a nominal annual rate, not APY. Effective annual return includes the selected compounding. Taxes, fees, market volatility and irregular dated payments are not modeled. Currency formatting does not convert amounts between currencies.
